Nestlé Group

The history of Nestlé dated back in 1866 when a 52-year-old Henri Nestlé, a Swiss German pharmacist, developed a pioneering nutritious powdered milk formula that saved the life of a premature baby. Since then **“Good food, Good life”** has been the mission of the company that he set the foundation over the last **150 years**.

Today Nestlé is the world's largest food and beverage manufacturer. Headquartered in Vevey, Switzerland, we have **more than 2,000 brands** ranging from global icons to local favorites, and we are present in **187 countries** around the world.

Food has the power to enhance life for everyone, today and for generations to come. We unlock this power with our healthy, delicious and convenient food and beverages. Meeting the needs of a growing population responsibly, with affordable nutrition. Helping advance the health of our planet and ensuring there will always be enough nutritious food, grown sustainably. Few companies have the people and culture, the knowledge and resources, the scale and sheer ambition to meet such challenges. We do.

**We are Nestlé, the
Good food, Good life
company.**

Our purpose

We unlock the power of food to enhance quality of life for everyone today and for generations to come.

Where we make an impact

We at Nestlé touch billions of lives worldwide; from the farmers we work with to the individuals and families who enjoy our products, the communities where we live and work, and the natural environment upon which we all depend.

Our purpose drives us to do at 3 levels of impact: **for individuals and families, for our communities and for the planet.** With these 3 levels of impacts, we have defined three overarching ambitions which will guide our work towards achieving our 2030 commitments and supporting the achievement of the UN Sustainable Development Goals.

Guided by our values rooted in respect - Respect for others; Respect for diversity and Respect for the future, we work alongside partners to create shared value - contributing to society while ensuring the long-term success of our business. We call this **Creating Shared Value**, and we embed it in everything we do.

FOR INDIVIDUALS AND FAMILIES

**Help 50 million children
lead healthier lives**

FOR OUR COMMUNITIES

**Help to improve 30
million livelihoods in
communities directly
connected to our
business activities**

FOR THE PLANET

**Strive for zero
environmental impact
in our operations**

Nestlé in Vietnam –25 years of enhancing Vietnamese lives

Consistent with our purpose that “We unlock the power of food to enhance quality of life for everyone today and for generations to come”, over the past 25 years in Vietnam, Nestlé has been consistently creating shared value with the community as well as developing sustainable business activities in Vietnam.

The milestones of Nestlé in Vietnam

Established La Vie

Company, a joint venture between Perrier Vittel (part of the Nestlé Group) and Long An Trading Company

1992

Inaugurated the Nestlé factory in Dong Nai

province where products like NESCAFÉ, MILO, and MAGGI are made

1998

1995

**Established
Nestlé Vietnam Co., Ltd.**
and started construction
of the Dong Nai Factory

Over the past 25 years, with outstanding achievements contributing to improving community health, increasing the state budget, and the country's socio-economic development, Nestlé Vietnam has been honored and given prestigious awards by Central and Local Government organizations.

2002

Started operating of the Hung Yen province factory, its second in the country, where the company produces La Vie bottled mineral water

**2009**

Expanded the MAGGI production line of the Dong Nai Factory

2011

Started construction of the Tri An Factory to produce NESCAFÉ, and acquired the Binh An Factory to produce MILO ready-to-drink products

**2013**

Inaugurated the Tri An Factory specializing in manufacturing NESCAFÉ

2014

Expanded the production line of ready-to-drink MILO products

**2015**

Inaugurated the production line of decaffeinated coffee beans at the Tri An Factory

2017

Inaugurated the Bong Sen Factory in Hung Yen province to produce milk and ready-to-drink MILO products, and inaugurated a modern distribution center in Dong Nai province.

**2018**

Inaugurated the NESCAFÉ Dolce Gusto Capsule production line in Tri An Factory

**2019**

Completed Phase 2 of Nestlé Bong Sen factory expansion project and inaugurated the first distribution center applying Obiter Robot automation technology in Hung Yen province.

**2020**

Joined hands with the government to support front liners during the Covid-19 pandemic by providing nutrition products, medical masks, and financial assistance; encouraged and supported more than 24,000 small business partners including cafes, street food vendors, and school canteens to overcome difficulties after the pandemic.

The efforts to realize the commitment in Vietnam

Guided by the Nestlé Purpose and Values, Nestlé in Vietnam is committed to creating positive impact to

3 LEVELS OF IMPACTS

For individuals & families

For communities

For the planet

INDIVIDUALS & FAMILIES

Enabling healthier and happier lives

To realize the Commitment of Nestlé Group:
"Help 50 million children lead healthier lives", Nestlé Vietnam commits:

- ✓ **Offering tastier and healthier choices**
- ✓ **Inspiring people to lead healthier lives**
- ✓ **Building, sharing and applying nutrition knowledge**

Offering tastier and healthier choices

- Launch more nutritious foods and beverages especially for mothers - to be, new mothers and children

Nestlé NAN

Nestlé NAN Supreme 3

HM-O (Human Milk Oligosaccharides) is a special component of breast milk. HM-Os are scientifically proven to help strengthen children's immunity. NAN Supreme 3 with Nestlé's exclusive 2 HM-Os formula supports the formation of a healthy intestinal microflora, which helps reduce children's risk of lower respiratory tract infections while reducing the likelihood of having to take medicines.

Nestlé NAN Organic

The ingredients of NAN Organic 3 for 2-6-year-old children are certified 100% organic by the National Association for Sustainable Agriculture Australia (NASAA). It has superior whey protein and 100% organic lactose, which help reduce constipation in children and support their digestive system, enable them to easily absorb nutrients, and support in creating a solid foundation for development. DHA & ARA are two special fatty acids that help children's brain development and improve vision. Zinc, Vitamin C & D also help boost children's immunity.

Nestlé NAN Optipro 4

NAN Optipro 4 for children 2 to 6 years' old contains Advanced Protein and 33 important nutrients that support children's digest system and contribute to healthy weight gain. With 100 million BIFIDUS BL probiotics, NAN Optipro 4 also helps to enhance children immune system.

NAN OPTIRPO KID RTD

Available in convenient, ready-to-drink format, NAN Optipro Kid has an advanced Swiss formulation with added HMO – 2'-FL, supporting improved digestion and immunity and providing other essential nutrients to support children's good growth in the pre-school stage and beyond.

Nestlé CERELAC

Available in a variety of delicious flavors, **Nestlé CERELAC** for children over 6 months old is fortified with zinc, iron, calcium and other vitamins – essential nutrition for kids when they reach the weaning age.

Gerber Organics

The GERBER Organics weaning snack for children aged 8 to 24 months old is certified as 100% organic by the U.S Department of Agriculture (USDA) standards. In addition to using safe sources for its refined ingredients, GERBER Organic weaning food also provide two essential nutrients – vitamin E and iron – which contribute to strengthening the immune system and helping children to grow healthier.

Nestlé Milk

Nestlé RTD Milk with Nutristrong formula from Nestlé Switzerland is an exemplary achievement of Nestlé after many years of research on the physical status of Vietnamese children in the growing up phase. With the exclusive Nutristrong formula, each Nestlé milk block contains 25% of a child's daily calcium needs. Also packed with other important necessary nutrients that support strong bones, the Nestlé RTD milk with Nutristrong helps children grow stronger.

Nutren Junior

Nutren Junior is a nutritious formula milk product of Nestlé's Health Care Unit. It is ideal for children aged 1 to 10 years old suffering malabsorption, who are in the process of recovering from illnesses, or are deemed malnourished. Its special formula is supplemented with ingredients such as whey protein to improve digestion, Synbiotics (Probiotics & Prebiotics) to improve immunity and digestive health, and DHA to enhance brain and visual development.

Malt Beverage

MILO is a nutritious energy drink with extracts from whole grain barley, milk and cocoa powder. It is also fortified with vitamins and minerals, providing balanced nutrition for children from six to 12-years of age. The wholegrain barley in MILO provides long-lasting energy for study, sports and other physical activities. MILO products include: MILO powder, MILO 3 in 1, MILO ready to drink (RTD). Besides MILO can is a favorite drink for active teenagers (13 – 19 years old).

Breakfast Cereals

Nestlé Breakfast Cereal with full grains as the main ingredient brings you and your family a tasty healthy and convenient breakfast. Full grain is the key ingredient for a balanced diet. The Nestlé breakfast cereal with low fat, high fiber, provides 25% of vitamins and minerals per servings based on the Recommended Daily Allowance (RDA).

Nestlé Cereal Powder

Nestlé NESVITA, a whole-grain cereal powder, contains essential nutrients and is the perfect way to inject vitality into the day. Nestlé NESVITA is imbued with essential nutrients such as calcium, fibre, iron, Vitamin A and reduced sugar wholegrain cereal, making it an ideal option for women who need to be fit and healthy for a busy day at work and at home taking care of family.

Everyday Nutrition Solutions

MAGGI products are indispensable tools in Vietnamese kitchens, helping cooks prepare delicious and nutritious family meals on a daily basis. Items in the MAGGI line include soy sauce, oyster sauce made with pure oyster extract, and fish sauce made with natural ingredients. MAGGI sauces are ideal for the preparation of Vietnamese dishes, while MAGGI bouillon imbues recipes with sweet, meaty flavours. MAGGI chilli sauce, on the other hand, uses only fresh, ripe chilis, and is free of artificial preservatives, making meals more delicious.

Leverage our marketing efforts to promote healthy cooking, eating and lifestyle

- MILO sports activities

In order to build an active balanced life style for young children, Nestlé MILO promotes the school sports movements. From National Hoi Khoe Phu Dong Football Tournaments, Ho Chi Minh City School Basketball Tournaments, Swimming Tournaments, Vovinam Tournaments for children... to annual sports events initiated by Nestlé MILO such as Energy Camp, Walking Day..., all those efforts are aimed at giving more chances for children to play sports.

Nestlé MILO believes that a good nutrition coupled with physical exercises will help Vietnamese children to grow at their fullest.

- "Choose wellness, Choose Nestlé"

To raise awareness of nutrition and health among consumers, especially whom are in rural areas, since 2010, Nestlé has implemented "Choose wellness, Choose Nestlé" roadshow program in many provinces with activities such as nutrition consultation, product sampling, cooking shows....

Until now, there are 10,725 roadshows held in 58 provinces, reaching about 5,539,000 consumers. The program will continue to expand in the coming years.

Apply and explain nutritional information on packs and online

● Nutritional Compass

The Nestlé Nutritional Compass can be found on almost all Nestlé products worldwide. It offers at-a-glance information to help consumers understand the nutrition value of each product and make the right choices for their own wellbeing and that of their family.

The Nutritional Compass can be found on the packaging of most Nestlé products in Vietnam.

Offer guidance on portions for our products

● GDA (Guideline Daily Amount)

In addition to the Nutritional Compass, a Guideline Daily Amount (GDA) is also featured on Nestlé's product packaging. GDAs are a guide to how much energy and key nutrients the average healthy person needs in order to have a balanced diet. GDA labels tell you at a glance how much of each key nutrient (i.e. calories, sugars, fat, saturates and salt) is contained in a portion of food within the context of the average daily requirements for each.

In Vietnam, GDA has been introduced on the packaging of Nestlé MILO, NESCAFÉ, NESTEA, MAGGI, Nestlé Milk and Yogu..

Develop, share and apply nutrition knowledge

Scientific workshops on nutrition

The Nestlé Nutrition Institute works closely with nutritionists and leading doctors in Vietnam and around the world to regularly hold seminars for health professionals, supporting them in keeping up-to-date on the latest trends and information on nutritional science.

Workshop to share experiences on building nutrition labels

In collaboration with the Ministry of Health and the participation of leading nutrition and health experts, Nestlé Vietnam organized workshops focusing on solutions to support the development of a healthy food environment. These solutions include Nutrition Labeling, which clearly discloses nutrition ingredients to help consumers understand the ingredients of food they take. Other solutions include establishing a food classification system to identify foods that are more beneficial to health and developing regulations on the marketing of unhealthy foods and ethical principles in marketing food products for children.

Nestlé Vietnam has also signed a Memorandum of Understanding with the Department of Preventive Medicine of the Ministry of Health in communication initiatives to improve people's knowledge of right nutrition as well as support the development of nutrition criteria for some popular foods and drinks, based on the recommended nutritional needs of Vietnamese people.

NESTLÉ for HEALTHIER KIDS

Nestlé for Healthier Kids

Launched in Vietnam, this global initiative aims to improve nutrition knowledge and practices for children aged 6 to 12 by promoting nutrition education, encouraging a balanced diet, and promoting physical activity and a healthy lifestyle.

Apart from classroom nutrition lessons, students can participate in outdoor interactive activities such as gardening, knowledge sharing or physical activity contests. Over the years, the program has reached over 32,000 students in 9 provinces (Bac Ninh, Hai Duong, Ninh Binh, Nam Dinh, Hung Yen, Dak Lak, Lam Dong, Dong Nai and Can Tho).

COMMUNITIES

Helping develop thriving, resilient communities

For this direction, Nestlé Vietnam commits to implement three areas:

- ✓ Enhancing rural livelihoods
- ✓ Respecting and promoting human rights
- ✓ Promoting decent employment and diversity

Enhancing rural livelihoods

Improve the livelihood for Vietnamese coffee farmers

The global NESCAFÉ PLAN for Sustainable Coffee Development was launched in Vietnam in 2011. Through this project, Nestlé Vietnam brings experiences in coffee farming and production to help Vietnam's coffee industry develop sustainably, improve the value of coffee beans, and enhance the lives of Vietnamese coffee farmers.

Cooperating with the Western Highlands Agriculture and Forestry Science Institute (WASI), Nestlé Vietnam has implemented the project in the provinces of Lam Dong, Dak Lak, Dak Nong, Gia Lai. Additionally, in Kon Tum province, the NESCAFÉ Plan provides seedlings and technical training to farmers to support the rejuvenating program for Vietnamese coffee plants.

Enhancing the stature and endurance of Vietnamese people: "Activ Vietnam" Program

In 2016 Nestlé Vietnam in cooperation with the General Department of Sports and Physical Training, the Ministry of Education and Training implemented program 3 of the National Project 641 – "Enhancing the stature and endurance of Vietnamese for the period of 2011 – 2030". With the name "Activ Vietnam", Program 3 of Project 641 has the content of promoting active lifestyle, regular exercise in the community in general and especially children aged 6-17 in particular.

The goal of the program is to support the local community in physical education and sports movements, provide sports facilities in schools, and encourage parents to create conditions for active children. The program includes a series of sports activities such as Hoi Khoe Phu Dong Sport Festival, Ho Chi Minh City Student Basketball Tournament, Vovinam Tournament, Swimming Tournament, Energy Camp, Walking Day to Raise funds for school sports... The program is implemented in Hanoi, Ho Chi Minh City and continues to deploy in other in other provinces.

Respecting and promoting human rights

Empower women

Starting in 2013, Nestlé has signed a commitment to implementing the Women's Empowerment Principles with the UN Women, a 7-Step Action Plan for Business to Enhance Gender equality and empowerment of women in order to participate fully in all economic activities in the workplace, in the marketplace and within the community, contribute to building a stronger economy, improving quality of life for women, family and society. To fulfill this commitment, gender equality and empowerment are being implemented by Nestlé Vietnam through the **NESCAFÉ Plan** and the **"Chi NEST" (Mrs. NEST)** projects.

In the central highlands, the **NESCAFÉ Plan** project started in 2011 to train female farmer group leaders to be a bridge to communicate the knowledge and experience of the project to coffee farmers.

The **"Chi NEST" project**, launched in 2016, has now expanded to over 2,000 communes in 20 provinces and continues to expand nationwide. Through the Provincial Women's Union and the Women's Union in each commune, Nestlé Vietnam builds a female team called **"Chi NEST" (Mrs. NEST)**, who will be provided with the necessary information on nutrition, health, and products, and will eventually become Nestlé representatives bringing this knowledge to women and other households in each commune.

In addition to generating additional income for rural women, this activity has a profound social meaning: to enhance the role and contribution of rural women in the work of building new rural sectors. In 2020, Nestlé Vietnam continues to coordinate with the Central Vietnam Women's Union to deploy the model of **"trusted women"** in the framework of the 939 / QD-TTg project of the Prime Minister to support women.

*In 2020,
Nestlé deploys
the model of
"trusted women"
in the framework of the
939 / QD-TTg project of
the Prime Minister to
support women.*

Promoting decent employment and diversity

Support the youth for employment opportunity

To help young people around the world, Nestlé Group launches the "**Nestlé needs YOUTH**" initiative. By the year 2030, Nestlé will support 10 million young people around the world in accessing employment opportunities and economic development.

In Vietnam, with the program "Management Trainees & Sales Trainees", Nestlé Vietnam annually creates employment opportunities and provide training for students who have just graduated from universities. Participating in this program, qualified young applicants will have the opportunity to learn and to work in a professional and dynamic environment, this is a favorable start to future career development.

By the year 2030
Nestlé will support
10 million young people
around the world in accessing
employment opportunities and
economic development.

PLANET

Stewarding resources for future generations

Nestlé Vietnam realizes this commitment by

✓ **Caring for water**

✓ **Safeguarding the environment**

WATER-CARE JOURNEY OF NESTLÉ VIETNAM & LA VIE

Caring for water

Recognizing the risk of water scarcity and climate change that are already negatively impacting people lives, since 2011 up to now, in the Journey of Protection of Water Resources, Nestlé Vietnam and La Vie Company have implemented many cooperation programs with the community to achieve sustainable socio-economic and environmental development, focusing on sustainable agriculture, protecting water resources, and using water efficiently.

RESPONSIBLE FARMING

30%

Water ratio reduction of **La Vie** factories in **2019** compared to **2010**

Safeguarding the environment

No waste to landfill

In Vietnam, Nestlé has been actively implementing this commitment. Four factories of Nestlé Vietnam have completed the goal of no waste to landfill. Types of waste produced during the production process are recycled and sorted out to produce animal feed from residues in food production, fertilizer from sludge and residues, using coffee ground to burn boilers, producing building materials such as brick recycled from ash and sand during coffee production. In addition, the company annually reduces 22% of CO₂ emissions per ton of product.

Plastics

In April 2018, the Nestlé Group announced its ambition to make **100% of its packaging recyclable or reusable by 2025**. Its vision is that none of its packaging, including plastics, ends up in landfill or as litter. Nestlé believes that there is an urgent need to minimize the impact of packaging on the environment.

In Vietnam, Nestlé Vietnam and La Vie have actively implemented this commitment in:

3 ASPECTS

- Developing the packaging of the future
- Building a future without waste
- Enhancing awareness and changing behavior to protect the environment.

Nestlé Vietnam introduces **PAPER STRAWS** for MILO Breakfast Drink

Remains sturdy

Developing the packaging of the future

In its future packaging development strategy, Nestlé Vietnam and La Vie have reduced or removed from the list of non-environment-friendly packaging materials, to be replaced by environmental-friendly materials.

In March 2020, Nestlé MILO began using paper straws for its MILO breakfast product. It is estimated that in 2020, Nestlé MILO will put into use more than 16 million paper straws, equivalent to reducing 6.7 tons of plastic waste. In addition, other brands such as NESVITA and Nestlé milk have also researched and developed paper straws for use, with the aim of having towards 100% of the instant drink products now using paper straws.

In December 2019, La Vie launched La Vie glass bottles in 450ml and 750ml sizes. The company also plans to use recycled plastic for product packaging.

*Nestlé's brands have
researched and
developed paper straws
for use:
Nestlé MILO,
NESVITA,
Nestlé Milk,...*

Building a future without waste

Nestlé Vietnam and La Vie are founding members of the Packaging Recycling Alliance (PRO Vietnam), a voluntary non-profit organization that aims to promote the collection and recycling of packaging from companies in the consumer goods and manufacturing industries in Vietnam. PRO Vietnam has signed a Memorandum of Understanding with the Ministry of Natural Resources and Environment to share goals, vision and responsibilities in promoting the circular economy in Vietnam through mitigation and classification activities and collecting and recycling packaging.

In response to the Plastic Waste Prevention Movement called by the Ministry of Natural Resources and Environment and the Prime Minister in June 2019,

Nestlé Vietnam has signed a commitment with the Ministry of Natural Resources and Environment to fulfill major goals including: recycling and reusing 100% of product packaging until 2025; having 100% of the factory's waste collected and sorted at source; pledging that 100% of factories do not revert solid waste into the environment; and actively guide the organization and launching of a movement to collect disposable plastic waste. By December 2019, 100% of Nestlé offices and factories in Vietnam have accomplished the goal of not using disposable plastic items.

Enhancing awareness and changing behavior to protect the environment

Project "Give MILO packs a second life"

MILO works with Revival Waste, a social enterprise in Vietnam focused on the environment, to implement the project "Give MILO packs a second life". The project encourages students to participate in collecting used MILO packaging at schools. The first phase of the project will be implemented at 400 schools in Ho Chi Minh City and then expanded to schools in Hanoi.

MILO new packaging

The new design on MILO packaging launched in February 2020 also reflects awareness of environmental protection.

Nestlé Vietnam commits to fulfill major goals

100% of the factory's waste collected and sorted at source

100% of factories do not revert solid waste into the environment

Recycling and reusing 100% of product packaging until 2025

100% of Nestlé offices and factories in Vietnam have accomplished the goal of not using disposable plastic items.

mGreen Program

Nestlé Vietnam cooperates with mGreen, a social enterprise, to carry out the program "Sorting and recycling waste at source" at schools in the urban area of Vinhomes Central Park in Ho Chi Minh City. The project aims to raise the awareness of students and parents about waste separation at source.

This initiative to carry out activities of sorting and collecting recyclables through mobile applications (mobile app) has been included in the subject of Service Learning in primary and secondary schools of the Vinschools network. In parallel with the implementation of mobile app for sorting and collection to recycle garbage, the school network has also established a team of Vinser & mGreen environment ambassadors, including pupils and teachers, to join in the collection activities, sorting waste and promoting the actions from school to home to spread the impact of the program. So far, the project has been successfully implemented in the entire Vinschool network in Ho Chi Minh City with more than 8,200 students and teachers; it aims to collect nearly 10 tons of recycled waste.

Activity for consumers

In June 2019, Nestlé Vietnam launched a program to collect and classify used product packaging for consumers. With the message "**Small Action, Big Impact**", the initiative can be seen at beaches, parks, bus stops, and convenience stores in **19 provinces and cities. 10,000 consumers** participated in the program, with more than **13,000** used product packs exchanged for new products.

Activities for Staff "Nestlé Cares" Program

In response to the World Ocean Day, Nestlé Vietnam and La Vie organized many activities for employees and communities to raise awareness of environmental protection. In June 2019, Nestlé Vietnam organized a beach cleaning and public awareness campaign called "For a blue ocean" at Phuoc Hai beach (Ba Ria-Vung Tau), with the participation of more than 250 Nestlé Vietnamese staff and families and local people. In one morning, Nestlé volunteers collected 1.2 tons of waste, including 900kg of recyclable waste, and donated 20 sets of eco-waste bins to the locality.
